

Copyright Policies for Rethinking Clinical Trials®: A Living Textbook of Pragmatic Clinical Trials

Original Content Created for the NIH Collaboratory Living Textbook

All original content created for the NIH Health Care Systems Research Collaboratory's *Rethinking Clinical Trials®: A Living Textbook of Pragmatic Clinical Trials* (the "Living Textbook") will be made freely available to the public, without any restrictions other than those noted in the Living Textbook copyright notice (please see Appendix 1: Copyright Notice).

All contributors of original content must agree to sign a Publications Agreement acknowledging this and releasing ("dedicating") their copyright to the public domain. Contributors are responsible for ensuring that the content they provide (in its original state as received by the NIH Collaboratory) does not infringe upon any other party's copyright and does not contain material that could be construed as libelous.

Contributors are also responsible for identifying any relevant conflicts of interest, financial or otherwise, that they may have. Contributors also acknowledge that any original material they provide is subject to editing, revision, and periodic updating, which may include the addition or removal of material by NIH Collaboratory staff or other NIH Collaboratory contributors.

Contributorship Definitions

Living Textbook contributors will be recognized as follows:

- **Contributor:** Subject matter expert who contributes substantively to the development or revision of the content. Drafts the content and/or reviews and revises it for important intellectual content. The Contributor is accountable for the accuracy of the work.
- **Contributing Editor:** Professional science writer/editor (NIH Collaboratory support staff) who collaborates with Contributors (subject matter experts) to perform background research and/or make substantive contributions to developing or revising content, subject to review and approval by the Contributor.

Other contributions that do not fit into one of these categories may be recognized in the acknowledgements.

Adapted Content Hosted on the NIH Collaboratory Living Textbook

Contributors of content hosted on the NIH Collaboratory "Living Textbook" are responsible for observing applicable standards for the re-use and adaptation of previously published materials and third-party data or communications, as described below:

Attribution of Content

Any content that is cited, quoted, excerpted, or adapted for use by contributors to the NIH Collaboratory must include [minimal attribution elements](#) such as those stipulated by the Uniform Requirements of the International Committee of Medical Journal Editors.

Permission to Use Copyrighted Material

Content contributors are also responsible for obtaining any necessary permissions for the re-use of [copyrighted](#) content from the holder of the copyright. This includes, but is not limited to, the following examples:

- Figures, illustrations, videos, sound recordings, charts, or tables taken from published journal articles, textbooks, websites, broadcasts, or other sources;
- Substantial portions of quoted text that exceed amounts permissible under the provisions of [fair use](#) as defined by U.S. copyright law; and
- Unpublished data or communications provided by third parties.

Please see Appendix II for tips on obtaining permission to use copyrighted material.

Additional Questions

Any additional questions about copyright or contributorship issues should be directed to the attention of Living Textbook staff editors at nih-collaboratory@dm.duke.edu.

Appendices

Appendix I: Living Textbook Copyright Notice

Except where otherwise indicated, material on this website (“Rethinking Clinical Trials®: A Living Textbook of Pragmatic Clinical Trials”) is dedicated to the public domain and may be freely downloaded, shared, adapted, or re-used. In cases where website content is noted as being under copyright, the copyright holder should be contacted for permission to share, reuse, or adapt the material.

Additional Guidance: Attribution, Disclaimers, and Trademarks

- Website content that is shared or reproduced without changes should be attributed to the National Institutes of Health (NIH) Health Care Systems Research Collaboratory and/or the Living Textbook, and, where appropriate, any named authors. Please see [here](#) for examples of how to cite *Living Textbook* materials.
- Website content that is modified, adapted, or edited must not be used in ways that imply the endorsement of personal viewpoints, products, organizations, services, or other commercial ventures.
- The NIH and NIH HCS Research Collaboratory logos should be removed from any modified, edited, or adapted content.
- Reference in this web site to any specific commercial products, process, service, manufacturer, or company does not constitute its endorsement or recommendation by the U.S. Government, the NIH, or the NIH HCS Research Collaboratory. Neither the NIH nor the NIH HCS Research Collaboratory is responsible for the contents of any external websites linked to or referenced from this server.
- None of the material on this site constitutes medical advice, nor is it intended to guide the treatment or diagnosis of medical conditions.
- The phrase “Rethinking Clinical Trials®” is a registered trademark of Duke University.

Contact Us

If you have any further questions about sharing, reusing, or adapting materials from the Living Textbook, or have any copyright-related questions about content on the site, please contact us at nih-collaboratory@dm.duke.edu.

Appendix II: Tips on Obtaining Permission to Use Copyrighted Material

When adapting or re-using copyrighted material, permission must be obtained from the *copyright holder*, which may or not be the author(s) of the material.

Journal websites typically include information on how to obtain permissions to re-use published content; in many cases, publishers use a clearinghouse service such as the [Copyright Clearance Center](#). Permissions available through such services can be obtained by filling out a web form and (when applicable) paying a fee for the permission, which is typically made available immediately. An additional notification letter to the author(s) of the work being adapted may be appropriate as a courtesy, but is not itself sufficient to secure permissions for re-use in any case where the author is not the sole holder of copyright.

In cases where copyright is not transferred to the publisher, permission must be sought from the original author or other copyright holder.

Adapting Material Published under Creative Commons Licenses

Material published under Creative Commons (CC) licenses, such as some open-access journal articles, can be adapted and/or reused according to the specific stipulations of the CC license. See [descriptions of available CC licenses](#) for more information.

Adapting Material in the Public Domain

Copyright does not apply to works that are in the [public domain](#) in the United States. Such material can be freely adapted and used without permission, although it must be appropriately attributed, as described above. Work in the public domain includes (but is not limited to) the following examples:

- Works for which the term of copyright has expired;
- Works produced U.S. federal government employees; and
- Works released (“dedicated”) to the public domain by the copyright holder.

Copyright is typically awarded for a finite period of time, but the length of that period depends upon variables such as when the work was created and/or published and the national and international laws that may apply. For more information, [this table](#) lists various points at which works pass into public domain under U.S. law.
